

The City of Cavalier Needs Your Help!

The City of Cavalier and the State of North Dakota need your help identifying pipes. Staff from AE2S will be knocking on doors to inspect the water service lines that deliver water into homes and businesses. The AE2S staff will need to see the pipe attached to your water meter and shutoff valve. The names and photos of the AE2S inspectors assigned to Cavalier appear below, along with a diagram of the pipe they need to identify.

Funding for Cavalier's LCRI assistance is provided through a contractual agreement between the ND Department of Environmental Quality Drinking Water State Revolving Fund and AE2S.
